20% CHEMICAL & WATER SAVINGS**

**COVERS 40,500 SQ. FT. PER HOUR**

**ADMIRAL 26** | CYLINDRICAL/DISC SCRUBBER

# ADMIRAL 26 | PRODUCT FEATURES

The Admiral 26 is a disc or cylindrical scrubber/sweeper with a 26" cleaning path and is equipped with Aqua-Stop brushes. The computer-controlled brushes follow the contour of the floor in both of the cylindrical and disc systems. The Admiral 26 is designed for heavy-duty industrial use. The durable construction consists of powder-coated structural steel tubing to resist corrosion and rotationally-molded polyethylene solution and recovery tanks. For exceptional maneuverability the machine turns 360 degrees on its own axis. The sleek, compact design with dual side entry and 180 degree view provides an excellent line of sight and results in total operator comfort by focusing on ergonomics. The easy-to-understand five position control panel ensures the machine is simple to operate. This machine contains a removable debris box on the cylindrical scrub deck and the two caster wheels ensure proper squeegee alignment. The Admiral 26 covers 40,500 sq. ft. per hour, features fully variable solution flow rate and 27 gallon capacity solution/recovery tanks.

### GREEN FEATURES

- SOUND LEVEL < = 69 dBs
- TOOL-FREE BRUSH/SQUEEGEE REMOVAL
- EQUIPPED WITH AQUA-STOP
- MAINTENANCE-FREE GEL BATTERIES AVAILABLE

FEATURES	BENEFITS
<b>Aqua-Stop System</b> Disc Only	20% Cost savings thru water and solution conservation.
<b>Scrub Deck Options</b>	Choice of Cylindrical or Disc scrub decks.
<b>Ergonomic Design</b>	Reduces operator fatigue, excellent line of sight and comfort zone. Provides maximum maneuverability and operator safety.
<b>User-Friendly Controls</b>	Simple, easy to understand icons and selector pad plus one-touch directional lever.
<b>Parabolic Squeegee</b>	Water is completely vacuumed, floor is dry and ready to walk on.
<b>Front Wheel Steer/Drive</b>	Allows optimum 66.5" turning radius and cleans hard to reach areas with this maneuverable machine.
<b>Tool-Free Brush Removal</b> Disc Only	Easy, quick-change brushes allow for the operator to make these changes. Providing more scrub time with better results.

*Aqua-Stop Technology is a thin rubber strip surrounding disc brushes that have been introduced and implemented at PowerBoss. This water and chemical reduction factor translates into economic gains for our customers as well as environmental benefits to display the overall effectiveness of Aqua-Stop.*

ADMIRAL 26 TECHNICAL DATA	
<b>Scrubbing Style</b>	Disc / Cylindrical
<b>Scrub Path</b>	26"
<b>Sweep Capable</b>	Cylindrical Wet Sweep
<b>Power Source</b>	36 volts
<b>Brush Motor Power</b>	Disc: 1.5 hp (1) Cylindrical: .75 hp (2)
<b>Brush RPM</b>	Disc: 300 RPM Cylindrical: 900 RPM
<b>Brush Pressure</b>	2 Settings
<b>Solution Capacity</b>	27 gallon
<b>Recovery Capacity</b>	27 gallon
<b>Scrub Brushes</b>	Disc: 13" (2) Cylindrical: 26" (2)
<b>Theoretical Productivity</b>	40,500 ft <sup>2</sup> /hr
